Systems, specified.

One grid, one accent, no decoration.
Everything a technical deck needs and nothing it does not.

02

SECTION — STRUCTURE

Density without noise

Tables and diagrams carry the argument. The grid is what keeps them legible at distance.

Every edge lands on a column.

Alignment is the only ornament this system allows — so it has to be exact.

METHOD

Structure first. Decoration last.

The slide is a 12-column field with a fixed 72px margin. Content is placed on columns, separated by 1px hairlines, and never centered.

Two type sizes do most of the work: one statement at 700–800, one support line at 300–400. Anything else is data.

What stays out

Shadows, gradients, icon sets, and stock imagery are not available at any level of this system.

RULES IN FORCE

01 One accent moment per slide

02 Hairlines, never shadows

03 Tabular numerals in every column

04 Pin every render to the fixed canvas

ENFORCED DRAFT

INVENTORY

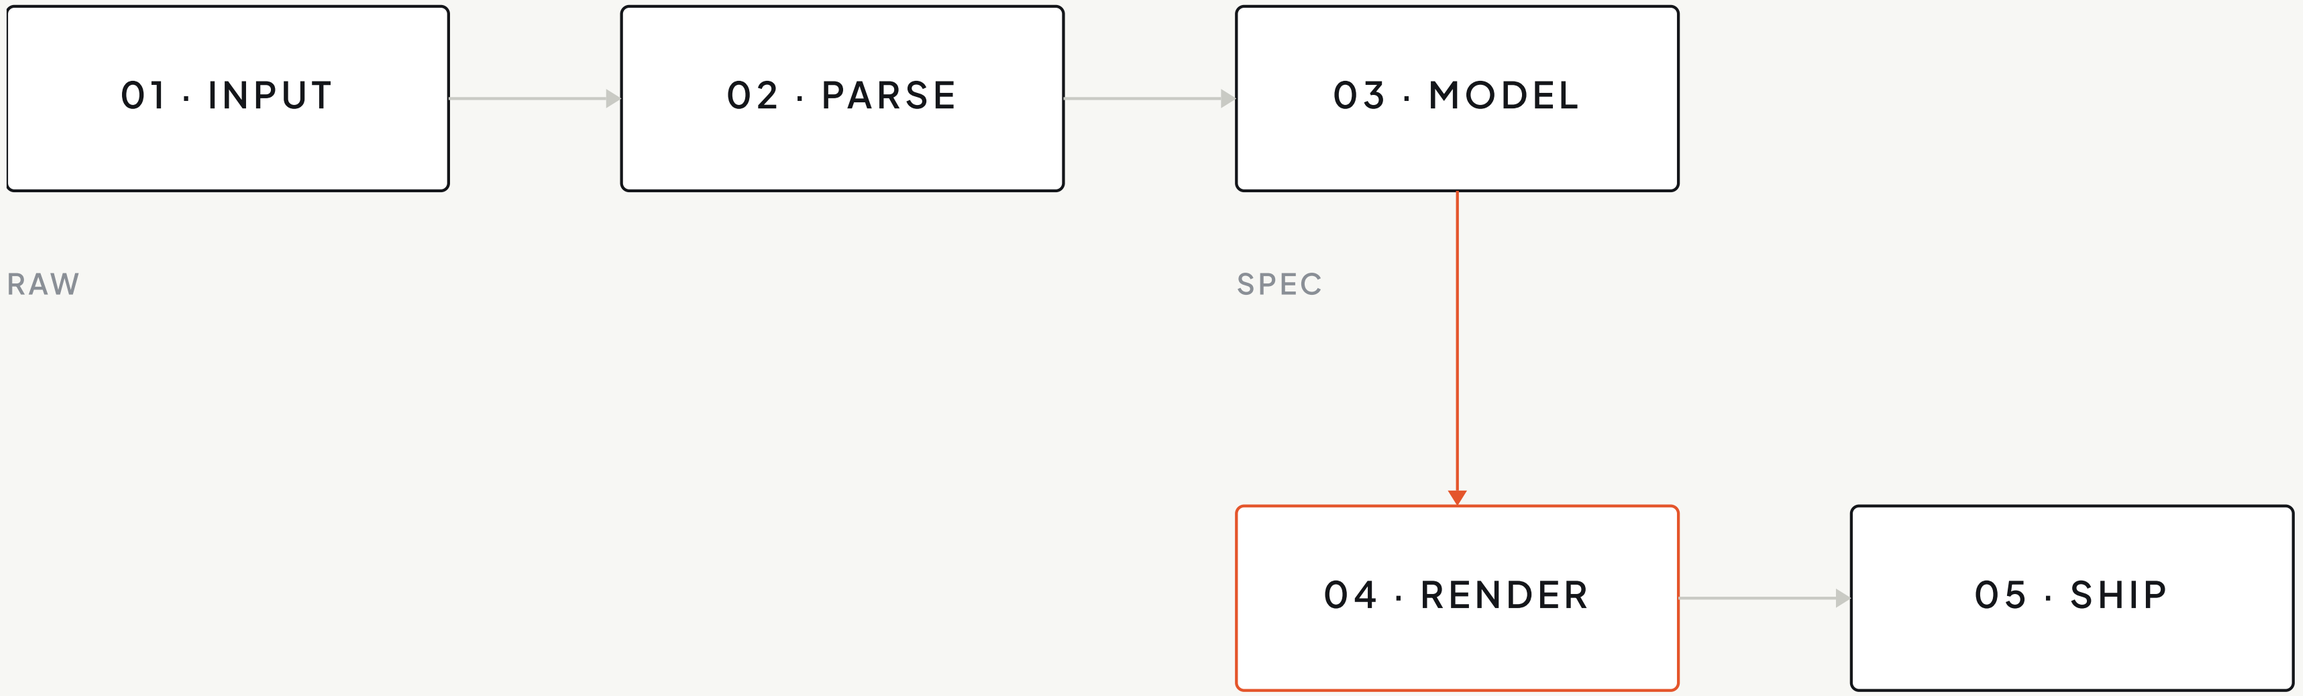

Components in review

COMPONENT	OWNER	STATE	COVERAGE	Δ 30D	UPDATED
Button / primary	Design system	Live	N%	±N	YYYY-MM-DD
Input / text	Design system	Live	N%	±N	YYYY-MM-DD
Table / data	Design system	Draft	N%	±N	YYYY-MM-DD
Navigation / rail	Product	Live	N%	±N	YYYY-MM-DD
Chart / line	Data	Review	N%	±N	YYYY-MM-DD
Modal / confirm	Product	Draft	N%	±N	YYYY-MM-DD

Sample rows. Every figure is a placeholder until it traces to a source — see design.md, “Numerals & Claims”.

FLOW

Pipeline, as specified

ACCENT = ACTIVE PATH

Start with the rule.

Template, tokens and rules live together. Change the tokens, not the layout.
